CS 549—Distributed Systems and Cloud Computing
Assignment One—RMI and Sockets—Rubric

Provide video demos demonstrating the following for your code:

☐ 35: Basic running and navigation (connect to server from client, navigate server file system from client, on separate EC2 instances):

☐ 10: EC2 firewall policy (security group) that restricts access but allows client and server to connect on any of each other's ports.

File transfer (between EC2 instances):

- ☐ 25: Active mode: upload and download

- ☐ 25: Active mode: upload and download

☐ 5: Completed rubric:

Total: ☐
